AGA-CPP-223-328 \$29.00 This AGA CPP replaces BMW Part # 21-51-1-223-328

AGA-CPP-202-659 \$24.00 This AGA CPP replaces BMW Part # 21-51-1-202-659

The problem is:

The BMW plastic clutch pivot pin fails or wears out prematurely in some cases, especially if car has high performance clutch or is driven hard. The temperature in the bell housing increases the radiant heat from clutch disc and pressure plate transfers to clutch fork causing failure or excessive wear of plastic pin.

This AGA pivot pin is made of silicon bronze. It offers superior wear characteristics, especially in high heat and high performance clutch applications where plastic easily fails.

Fitment/ Applications: AGA-CPP-223-328

Installation Instructions: AGA-CPP-223-328

This AGA CPP replaces BMW Part # 21-51-1-223-328

To install the pin, simply place pin in hole. Place socket that fits over dome without touching the end of pin. **15mm 12 point** socket works well for this. Lightly tap socket with extension until the pin is fully seated. It is normal for the pin to fit tight.

DO NOT hit end of pin with a hammer, punch extension, etc

How to mount: AGA-CPP-223-328

Installation Instructions: AGA-CPP-202-659

This AGA CPP replaces BMW Part # 21-51-1-202-659

To install the pin, simply place pin in hole. Place socket that fits over dome without touching the end of pin. **13mm 12 point** socket works well for this. Lightly tap socket with extension until the pin is fully seated. It is normal for the pin to fit tight.

How to mount: AGA-CPP-202-659
